Professional Summary

Detail-oriented Computer Science undergraduate specializing in Data Science, with a strong foundation in machine learning, full-stack development, and AI-driven solutions. Passionate about tackling complex problems and building scalable applications. Eager to contribute to a high-impact team, leveraging skills in Python, Java, and modern AI frameworks to drive innovation and reshape the future of commerce.

Education

B.Tech in Computer Science and Engineering (Data Science)

Expected June 2027

Vellore Institute of Technology, Chennai, Tamil Nadu

Relevant Coursework: Data Structures & Algorithms (DSA), Design and Analysis of Algorithms (DAA), Object-Oriented Programming (OOPS), Machine Learning.

Experience

Summer Research Intern

Summer 2025

Vellore Institute of Technology, Chennai, Tamil Nadu

Applied deep learning techniques, specifically Generative Adversarial Networks (GANs), to develop a novel solution for glare removal in eye images.

Engineered a hybrid image processing pipeline, combining classical computer vision methods with deep learning models for robust artifact detection and restoration.

Tech Stack: Python, TensorFlow, Keras, OpenCV, NumPy, Pandas, Matplotlib, GANs.

Marketing and Sponsorship Lead

Ongoing

CodeChef VIT Chennai Chapter, Chennai, Tamil Nadu

Led the marketing and sponsorship division for the university's competitive programming chapter.

Successfully organized and facilitated multiple coding events and workshops to enhance technical skills among students.

Projects

Learning Management System

Designed, developed, and deployed a complete web application, managing both front-end and back-end implementation.

Tech Stack: JavaScript, React, Node.js, FastAPI, MySQL, PostgreSQL.

Smart City Noise Prediction

3D City simulation with three js with a trained Deep Learning model to predict sounds and their intensity, managing sound Across a given area of a city.

Tech stack: Python, Keras, Scikit-learn, Tensorflow

Technical Skills

Programming Languages: Java, Python, C/C++

Frameworks & Libraries: React, Next.js, TensorFlow, Keras, OpenCV

Databases & Middleware: MySQL, PostgreSQL, MongoDB

AI/ML: Machine Learning, Generative AI, LLM Frameworks (LangChain, LangGraph), Deep Learning

DevOPS: Amazon Web Services, Docker, Kubernetes

Core Concepts: Object-Oriented Programming (OOPS), Data Structures & Algorithms (DSA), Design & Analysis of Algorithms (DAA), Operating Systems (OS), DBMS, Computer Architecture (CAO)

Achievements & Certifications

Hackathon Finalist: Achieved Finalist status in a competitive hackathon held at VIT Chennai during the second semester of 2024.

Java DSA Certification: Earned a certification in Java Data Structures and Algorithms, demonstrating proficiency in fundamental computer science concepts.

Certificate for 100% attendance on University Day 2025.
